

Vitex Satin Eco

Premium quality ecological and antimicrobial satin emulsion paint for interior use

Ecological and antimicrobial satin finish paint for interior use.

Certified according to the criteria of the European Union Ecolabelling Board (EUEB), according to standard EN 71-3 for non-heavy metal migration from toys and toys materials and by the Industrial Microbiological Services Ltd (IMSL, UK) for antimicrobial activity according to ISO 22196 (Certificate No: 1029224.3).

Vitex Satin Eco due to its special formulation reduces 99,99% bacteria on the painted surface, so it's ideal for areas that require more aseptic surfaces and hygienic conditions.

Low odour product during its application due to the absence of ammonia or other dangerous substances, such as aromatic hydrocarbons, free formaldehyde, heavy metals or alkylphenolethoxylates.

It has great levelling properties offering a velvet texture on plaster, concrete, plasterboard, etc. It provides superior whiteness, great hiding power, high spreading rate and exceptional fastness to frequent washing (Class 1, EN 13300/ISO 11998), detergents and to yellowing effects of smoking.

- Ecological
- Antimicrobial with antibacterial activity
- Luxurious satin finish
- High durability to frequent washing

Application field

Interior new surfaces made of concrete, plaster, brick, gypsum boards or old painted surfaces

Ideal for areas such as:

- Children's rooms, Schools, Nurseries
- Medical Practices, Hospitals, Maternity Clinics
- Hotels, Restaurants, Fitness Centers

Certified & in compliance as:

Ecological paint

Paint with high resistance to frequent wet scrubbing

Antimicrobial paint

Paint suitable for toys

Base W	1 Lt	3 Lt	10 Lt

Dilution

Water
8-10%

Drying time

Touch dry
45-60 min

Recoat
3-4 h

Color cards - fandecks:

HOW TO APPLY

Preparation

Surfaces should be smooth, clean and dry, free from grease, dust, loose or flaking paint. Vitex Satin Eco is directly applied on already painted surfaces as long as the old paint is sound.

To fill any cracks or holes use Acrylic Putty or Visto.

Old surfaces previously covered with water paints or distempers (lime wash or ceiling white) should be primed with Acrylan Unco Eco.

New surfaces made of plaster, concrete, cement, plasterboard, etc. should be first primed with Acrylan Unco Eco.

Surfaces stained from smoke, graffiti, coffee or any other kind of stain should first be primed with Blanco Eco.

For maximum opacity in dark and intense (such as blue, red and yellow) final shades, it is recommended to apply one coat of PreColor Primer colored - depending on the final shade - through Vitex Coloring System.

Application

Step 1

Dilute 8-10% with water and stir well before use.

Step 2

Apply the first coat by brush, roller or airless spray gun.

Step 3

Recoat after 3-4 hours.

tips

- Application at 5-35°C and <80% RH.
- The product must be exclusively tinted through Vitex Coloring System in the recommended base.
- Tools must be cleaned immediately after use with water and if needed, with soapy water or detergent.
- Allow at least 3 weeks before cleaning and washing newly painted surfaces with Vitex Satin Eco. Wash gently with water using a soft sponge. In case of tough stains, use a mild colourless detergent or soapy water.
- Minimise paint wastage by estimating how much paint you will need.
- Recover unused paint for re-use. After paint application, seal the container and store it for future use.
- Do not dispose of liquid waste into ground water table. Unused paint requires special handling for safe disposal.
- For more information as to why this product has been awarded the Flower please visit the web-site: <http://www.ecolabel.eu>

ADDITIONAL INFORMATION

VOCs (Volatile Organic Compounds)

"Interior matt walls and ceilings (Gloss≤25@60°)"
VOC content limit 30 g/L.

Maximum VOC content <10 g/L VOCs (ready for use product).
